State of Alabama, Shelby County.)

Whereas, Lot "A" of G. A. Nabors Survey of the town of Wilton, Shelby
County, Alabama, is a Lot 93.7 feet facing on the Southern Railmay right of way, running
back about along the Southwestern line of said lot 249 feet to the extension of Church Street
and fronting 98.8 feet on Church Street, as extended, the Northeastern line thereof being 248.16
feet in length.

and Whereas, in making deed in the year 1936 to said Lot "A", on the date of Nov 2nd, to W.C.Hardman, Mrs.A.L.Davidson and others described the above Lot erroneously as all of Lot "A" fronting SE 72 feet on the NW side of the Southern Railway and extending back NW 200 feet to Church Street and bounded NE by the W.H.Wooley Lot and SW by H.J. Harrison Lot and Alley.

and whereas, I, the undersigned, am entirely familiar with the physical property comprised in and by the description of Lot "A" aforesaid, having lived on adjoining property for the past twenty one years, and also being familiar with all of the property contegious thereto and hear by, I make affidavit to the fact that the property known as "Lot A" is and should be described as 93.7 feet facing on the Southern Railway right of way, on the Northwest side thereof, and running back on the Southwestern line 249 feet to the extension of Church Street and fronting 98.8 feet on Church Street as so extended, the NE line thereof being 248.16 feet in length. I further state on oath that the SW side of said property is bounded by an alley which is the property of the Town of Wilton, Alabama, and that across the alley is the H.J.Harrison Lot, which is the same as Lot 1 Block 1 of said G.A.Nabors Surbey, which Lot in reality does not touch Lot "A".

I further state on oath that the W.H. Wooley Lot bounds bot "A" (according to the true description thereof as 93.7 feet facing on the Southern Railway right of way, on the NW side thereof, and running back on the SW line 249 feet to the extension of Church Street and fronting 98.8 feet on Church Street as so extended, the NE line thereof being 248.16 feet in length) on the NE side thereof, which is a part of same lot as is shown on Map as Lot C. I further state on oath that the Peol Lot was and is now a part of said Lot "A"; further that the lines and fences bounding said Lot "A" are well established, and have been so for more than twenty years, and show same to be a Lot 93.7 feet facing on the Southern Railway right of way, running back on the Southwestern line 249 feet to the extension of Church Street and fronting 98.8 feet on Church Street, as extended, the Northeastern line thereof being 248.16 feet in length; further that giving these dimensions to said Lot "A" there is no overlapping of same on contiguous Lots and that using the dimensions of contiguous Lots as the Map now shows them, and the above correct description of said Lot "A", there is made up the entire feetage of the Block 1 of G.A. Nabors Survey, and that this is also verified by actual measurements of the Lots comprising said Block 1, and by monuments of title long established as determining the corners and boundaries of said property.

H. J. Harrison
