ALABAMA POWER COMPANY

Birmingham 2, Alabama

March 22, 1963

Mr. James L. Ray, County Engineer Shelby County Highway Department Columbiana, Alabama

Doar Mr. Ray:

Re: Highway Project No. SACP 4435-A

Reference is made to your request for the use of a portion of Alabama Power Company's right of way, Lock 12 - Lay Dam 110 KV Transmission Line, by Shelby County Highway Department for the subject project.

This is to inform you that this company has no objections to the joint use of our right of way with Shelby County based on the information you furnished Mr. M. W. White of our Tuscaloosa office and Mr. K. C. McAliley at the meeting held on February 19, 1963, on the project site.

Due to the urgency on the part of Shelby County, Alabama Power Company is willing for you to proceed with the work immediately on the condition that this company be granted authorization to bill Shelby County or the proper authority for the expense incurred in the revising of our Lay Dam - Leeds telephone line. Such expenses were itemized by Mr. F. S. Toomer, Supervisor of Transmission Lines, in his letter dated March 15, 1963, addressed to you.

Very truly yours,

Ollie D. Smith

Manager, Land Department
