hereto which require changes in the electric system, the Developer shall pay for any increases in the cost of the required installation. Such payment shall be made within ten days after the effect of such change has been determined, or if no payment has been made by Developer, such payment shall be reflected in the notice to Developer that payment is due; and

WHEREAS, Developer has filed for record restrictive covenants requiring all lot owners to install electric service in accordance with the Underground Residential Distribution Program; and

WHEREAS, Developer's total installation payment under this agreement is equal to \$ 8,025.03, which said amount represents the Company's estimated cost of the underground distribution system in excess of the estimated cost of an overhead distribution system, both of said cost calculations being exclusive of individual lot service; and

WHEREAS, Developer understands that Developer's installation payment will not be subject to refund to Developer but may be subject to refund to owners of lots in the subdivision who establish permanent electric service to homes therein prior to fifth anniversary of this agreement and pursuant to the terms and conditions herein contained.

NOW, THEREFORE, in consideration of the premises and the mutual obligations herein-

1. (FILL IN APPLICABLE PROVISION):

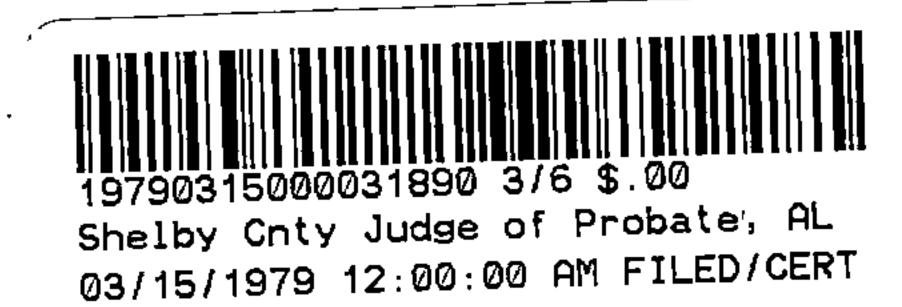

PAGE

BOCK

Developer will pay Company the total amount of the installation payment(\$ N/A within ten (10) days from the date of Company's written notice to Developer that said payment is due.

Developer has paid Company the total amount of the installation payment (\$ 8,025.03

- 2. Company will own, install and maintain a single phase, underground electric distribution system, including surface mounted transformers, surface mounted enclosures which may contain electrical equipment such as sectionalizing devices, capacitors, regulators, etc., and underground cables and the service lateral to the meter socket or service entrance for each residence in the said subdivision.
- 3. Developer, prior to the sale of any of said lots in said subdivision, will grant Company, in writing, such rights, easements and restrictive covenants as Company deems reasonably necessary to enable it to install, operate and maintain the underground distribution facilities, including the necessary service lateral on each lot, contemplated by this agreement.
- 4. Developer will, coincident with the sale to a third party of any of said lots in said subdivision prior to the establishing of permanent electric service, secure an agreement from the said third party in a form to be provided by the Company to the Developer providing for the installation of individual underground electric service under the Company's Rules and Regulations on file with the Alabama Public Service Commission relating to underground electric service in subdivisions. Such agreement will be forwarded to the Company immediately. The Developer shall notify the individual Lot Owners that at the time permanent electric service is established a contribution may be required from the Lot Owner, subject to the terms of the Developer's URD agreement with the Company.
 - 5. In the event Developer requests initial permanent electric service to any

of the lots in said subdivision he shall be considered the lot owner for the purpose of this agreement.

6. The Developer shall give the appropriate District Superintendent a minimum of sixty days written notice prior to the commencement of the installation of any paving, streets, curbs, sidewalks, etc. After the expiration of 30 days from the date hereof, such notice must be given 30 days prior to the commencement of such installation.

The Developer shall, prior to the Company's construction of the underground distribution system, make the easement in which the underground equipment and conductor are to be located accessible to the Company's equipment, remove all obstructions and grade to within four (4) inches of the final grade elevation. Streets, lot lines and easements shall be clearly marked before URD facilities are installed. All costs incurred by the Company due to improper or inadequate site preparation as stated above, shall be added to the net billing to the Developer. These costs will not be refundable.

- 7. If initial permanent electric service, single phase, is established within five (5) years from the date hereof, Lot Owner will pay to the Company at the time such service is established the estimated excess trenching cost associated with installation of such service plus the total of either:
 - a. \$ 136.00 for 200 ampere underground lot service not in excess of seventy (70) feet plus \$ 1.07 per foot for each foot of such underground lot service in excess of seventy (70) feet, or

り

b. \$ 274.00 for 400 ampere underground lot service not in excess of seventy (70) feet plus \$ 1.38 per foot for each foot of such underground lot service in excess of seventy (70) feet.

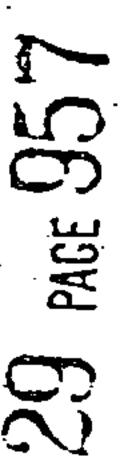

When electric service is established subsequent to the fifth anniversary of this agreement, such payment will be the amount equal to the then current cost data established by the Company and on file with and approved by the Alabama Public Service Commission, plus the cost of any excess trenching associated with the installation. Payment of such amount, less any refund due as calculated in Paragraph 8, below, will be made at the time permanent underground electric service is established to each permanent dwelling constructed on each lot in said subdivision.

The cost of any "excess trenching" is defined as that cost incurred over and above the costs generally associated with trenching for underground residential distribution which is due principally to rock or debris removal requirements, requirements to obtain suitable back fill from off-site, trench depth requirements different from that generally employed by the Company, or requirements for boring or additional equipment not generally employed by the Company for underground residential trenching.

- 8. At the time initial permanent underground electric service is established to a permanent dwelling constructed on any lot in such subdivision or sector thereof, the Company will calculate a refund (without obligation for any interest) to the lot owner as follows:
 - A. If permanent electric service is established prior to the fifth anniversary of this agreement:
 - (1) Multiply the estimated annual revenue in effect on the date hereof by

 .76 (investment to revenue ratio) and subtract \$ 350.00

 (average cost of an equivalent overhead system). The resulting amount

Shelby Cnty Judge of Probate, AL 03/15/1979 12:00:00 AM FILED/CERT

derived will not be considered as less than zero. The investment to revenue ratio and average cost of an equivalent overhead system will be established by Company and be on file with and approved by the Alabama Public Service Commission.

- Determine the amount of the lot owner's payment according to Paragraph 7 of this agreement and add to such amount the Developer's average per lot payment.
- (3) The amount of the refund will be the amount calculated in A (1) or A (2) of this Paragraph 8, whichever is less.
- If permanent electric service is established on or after the fifth anniversary of this agreement:
 - (1) Multiply the estimated annual revenue by the then current investment to revenue ratio and subtract the then current average cost of an equivalent overhead system. The resulting amount will not be considered as less than zero. The then current investment to revenue ratic and average cost of an equivalent overhead system will be established by the Company and will be on file with and approved by the Alabama Public Service Commission.
 - (2) Determine the amount of the lot owner's payment according to the provisions of Paragraph 7 of this agreement.
 - (3) The amount of the refund will be the amount calculated in B(1) or B(2) of this Paragraph 8, whichever is less.
- 9. Company, its successors and assigns, will retain title to the underground distribution system, including the underground service lateral and outdoor metering trough serving each said residence, and said underground distribution system provided by Company will not in any way be considered a fixture or fixtures and thereby a part of said real estate but will remain personal property belonging to Company, its successors and assigns, and will be subject to maintenance and removal by Company, its successors and assigns, in accordance with the applicable Rules and Regulations approved by the Alabama Public Service Commission. This covenant touches and concerns and benefits the land and shall run with the land and shall be binding on Company and Developer, their respective heirs, executors, administrators, successors and assigns.

10. Any written notice to the Company	provided for herein shall be addressed to
Alabama Power Company, Division Manager - En	nergy Services 15 South 20th Street.
Birmingham , Alabama 35233 .	Any written notice to Developer provided for
nerein shall be addressed to Mr. Steve Rus	so, 108-A Jetty East Condo.
Destin, Florida 32541	
IN WITNESS WHEREOF, each of the partie day and year first above written.	s hereto have executed this agreement on the
