- 12. In paragraph (1) of this Lease which sets forth the substances covered and conveyed by this Lease and describes the lands to which this Lease is applicable, which paragraph is commonly known as the granting clause, there shall be added at the conclusion of the paragraph the following sentence:
- " The word gas as used herein shall also include coalbed gas, methane, occluded natural gas and any other naturally occurring gases contained in or associated with any coal seam, vein, bed, strata or deposit."
- 13. Lessor specifically grants to Lessee so much of the subsurface coal deposit as is reasonably necessary to drill and produce the occluded natural gas found in the coal seams. In addition, it is understood and agreed that in order to obtain maximum efficient recovery of occluded natural gas from coal seams, Lessee may hydraulically fracture or stimulate the coal seams and adjacent rock. Lessee shall be specifically relieved of any and all damages of any nature for any such stimulation, and Lessor hereby forever releases and discharges Lessee, its successors and assigns from any and all liability for such damages, including loss of coal.
- 14. Any coal mining Lease or other mineral Lease whether it be for surface mining or underground operations, executed subsequent to this Lease shall be expressly subject to the rights of the Lessee under the terms and conditions of this Lease.
- This Lease shall cover only oil, gas, coalbed gas, methane, occluded natural gas, helium, associated hydrocarbons and sulphur, and does not cover coal, iron ore, or any other mineral in, on, or under said lands, except as set out in paragraph (13) above.
