

POWER ROLLERS

Power Rollers are designed to be the next generation in footgear that adds speed and momentum to those wearing them. Power Rollers are basically a boot with a plate of ball bearings secured to the sole.

The Basic working unit of Power Rollers is a cut to fit piece of ball bearing transfer table stock. The table stock (made of suitably hard plastic) is cut to fit the boot with room at the front for a hard rubber stop used to push off and provide momentum, or to stop.

SHELBY COUNTY JUDGE OF PROBATE
001 MCD 8.50

Stop

2-3 rows of ball bearings
of suitable size and place-
ment.

Side view of wrap around
stop. The rolling plate
would fit into the depres-
sion of the stop.
